Separation and Isolation of α -Santalol and β -Santalol from Sandalwood Extraction

Reveleris® iES Flash Chromatography System

Introduction

Sandalwood oil is an essential oil obtained from the steam distillation and or alcohol extraction of chips and billets cut from the heartwood of the Sandalwood (Santalum album) tree. Sandalwood oil is used in perfumes, cosmetics, and pharmaceuticals.

This application note shows the benefit of ELSD detection using Reveleris® automated flash instrument for the separation and isolation of the two main non-chromophoric compounds, $\alpha\textsc{-Santalol}$ and $\beta\textsc{-Santalol}$, in Sandalwood.
